  - Automation & Process Improvement
  - Technical Documentation & Onboarding
- 

## Professional Experience

**Software Solutions Integrated** — *Avon, IN*  
**Software Developer** | *Oct 2022 – Mar 2025*

- Led a full front-end refactor within 4 months, enhancing maintainability and performance.
- Fixed 3,000+ bugs in a large agronomy application, significantly improving user experience.
- Created a detailed ERD and a developer onboarding guide to support Angular 15 migration.
- Played a key role in modernizing legacy C#/WinForms systems into Angular-based web apps.
- Built customer-facing features and admin tools for better data visibility and workflow.

**DeveloperTown** — *Broad Ripple, IN*  
**Software Developer** | *Feb 2021 – Jan 2022*

- Delivered software solutions for 4 clients, leading full dev cycles in an Agile environment.
- Designed and implemented a Zebra printer labeling system, improving operational efficiency by 90%.
- Resolved 1,000+ bugs and collaborated with 50+ devs across multiple teams.
- Spearheaded major development initiatives, reducing release cycles to just 2 months.

**Various Roles** — *Indianapolis, IN*  
**Non-Software Roles (COVID Gap)** | *Feb 2022 – Oct 2022*

- Took on non-tech roles to remain employed during pandemic-related layoffs.
- Gained valuable soft skills and work ethic applicable to team-based software development.

**Coactive Apps** — *Indianapolis, IN*  
**Business Software Developer** | *Feb 2019 – Oct 2020*

- Became the in-house expert on proprietary JavaScript canvas technology.
- Integrated 6 systems into one using JavaScript, React, AWS, and SQL.
- Developed mobile/admin tools with Cordova and Docker.
- Resolved 1,000+ customer support cases, improving retention and satisfaction.

---

## Education

**ElevenFifty Academy**  
*JavaScript Certificate in Software Development* | 2018

**Lebanon Senior High School**  
*Core 40 Diploma* | 2016
